PROFILE

Through self-study I build and secure my own Azure environment: from RBAC and phishing-resistant MFA to a live AI chatbot with a hard cost cap. I am looking for a permanent role as a cloud engineer or an IT traineeship.

$10 budget cap per month

0 API keys in the browser

<$0.02 spent so far

PROJECTS

Website with AI chatbot, live on Azure

- Azure Static Web Apps, deployed automatically via GitHub.
- Chatbot via Azure Functions to Azure OpenAI; key stays on the server.
- Hard cap of $10 per month, tracked in Table Storage.

Own Azure environment, set up and secured

- Least privilege with RBAC: Owner, Contributor, Reader.
- Admin accounts with phishing-resistant passkeys and FIDO2, plus Authenticator.
- Resource lock, secrets in Key Vault, storage on the Cold tier.

Security demos

- Azure defence game with attack simulation.
- Phishing training in a simulated inbox.

WORK EXPERIENCE

Technical customer support agent 2024 – Sep 2026
Yourhosting · domains, SSL (Let's Encrypt), account management

Customer service agent 2014 – 2023
